

Rules for processing data for maintaining statistics

1. Cookies are small text files placed on the device's hard drive during use of various sites, designed to assist in customizing the user interface, and containing information about the User's previous visits to the Site.
2. To maintain statistics and analyze the operation of the Site, the Operator processes information related to user preferences using metric services (including Yandex.Metrica), namely:
 - cookies;
 - information about the actions of Site Users;
 - information about the User's equipment and browser;
 - IP address;
 - date and time of the session;
 - referrer (address of the previous page).
3. If you refuse to process cookies, the User must stop using the Site or disable the use of cookies in your browser settings.
